

CONTENTS

04/ Executive Summary

06/ Mapping the markets

12/ Bonds' and equities' big picture: bond yields should peak soon, now that the SLR issue has been resolved; equities may switch back to positive covariance with yields

16/ Timing and Tactical Insight

The current uptrend on risk-assets may push higher into late April / early May

“

People Are Starting To Believe That Stimulus Is Permanent” .

J. Gundlach

24/ China's CNY will weaken sharply very soon, as the high valuation of the domestic currency starts to bite into exports. This May Hobble The Ongoing Commodity Bull Phase

26 / Timing and Tactical Insight

Cyclical currencies should top out mid Q2. Then what?

35/Gold may have a few weeks of price appreciation, and some weakness thereafter; massive US debt issuance should continue to support gold price longer term

37 / Timing and Tactical Insight

Gold may bounce this Spring, yet may take more time to re-confirm its long term uptrend

43/ The commodities “supercycle” gets set to ignite base metals take-off as super-abundant global liquidity is put to work on major infrastructure projects; Chinese soybean and corn demand supercharges agriculture prices

47 / Timing and Tactical Insight

Agricultural Commodities are rather counter-cyclical, they may outperform during mid/late Q2 and into the Summer

54/ Splicing the markets - High Growth themes may stabilize from April
